UCHE EMMANUEL INNOCENT

Full-Stack Software Engineer | AI Integration Engineer

Benue, Nigeria | ucheinnocent070@gmail.com | Open to Remote / International Roles

github.com/Uco7 | linkedin.com/in/uche-innocent-60741624b

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and AI Integration Engineer with 5+ years of experience designing and shipping production web and cross-platform mobile applications for global clients and end users. Specializes in React, React Native (Expo), Node.js/Express, and MongoDB, with proven experience integrating AI providers (OpenAI, Google Gemini, Groq, OpenRouter) into secure, scalable products. Comfortable owning projects end-to-end — architecture, API design, cloud deployment, and post-launch support — in fully remote, asynchronous teams.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React, React Native (Expo), Next.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, REST API design, JWT Authentication

Databases: MongoDB, Mongoose

Cloud & DevOps: AWS (EC2, S3, VPC), Docker, Render, Cloudflare Pages, Git/GitHub, CI/CD

AI Integration: OpenAI API, Google Gemini API, Groq, OpenRouter, prompt engineering

Payments & Other: Paystack, Google AdMob, App Store / Google Play deployment

PROFESSIONAL EXPERIENCE

Independent Full-Stack & Mobile Software Developer — *Freelance / Self-Directed* 2021 – Present

- Design and build full-stack web and cross-platform mobile applications end-to-end, from requirements through deployment, for clients and personal ventures.
- Architected an AI Content Studio platform (React/Vite/Tailwind frontend, Node.js/Express/MongoDB backend) that layers OpenAI, Gemini, Groq, and OpenRouter to generate stories, images, voiceovers, music, and video from a single pipeline.
- Built and shipped a React Native/Expo BookStore application with a companion React admin panel, including JWT-based authentication, session/online-status tracking, in-app and web account-deletion flows, and Google Play Data Safety compliance.
- Developed and maintain ucmediaplayer, a React Native/Expo media player with embedded album artwork retrieval and optimized screen navigation for a smooth listening experience.
- Implemented secure payment flows with Paystack and monetization via Google AdMob across mobile products.
- Deployed and maintained production infrastructure on AWS, Render, and Cloudflare Pages, including SPA routing configuration, environment-based secrets management, and uptime monitoring.

Software Developer — Industrial Training — *Goodisoft Technology* 2020 – 2021

- Contributed to React Native application features and REST API integrations within an agile development team.
- Built AI-assisted automation workflows to streamline internal processes and reduce manual effort.

- Collaborated with senior engineers on code reviews, debugging, and feature testing, strengthening production-grade development practices.

SELECTED PROJECTS

BookStore Mobile Application: React Native/Expo app with a React web admin panel; JWT auth, account management, and Play Store compliance features. github.com/Uco7

MySchoolSearch: Nigerian education platform covering university admissions, JAMB guidance, and scholarships; improved SEO, structured data, and Search Console indexing.

AI Content Studio: Full-stack platform generating multimedia content (text, image, voice, video) via layered AI providers (OpenAI, Gemini, Groq, OpenRouter).

Student Result Upload & Complaint System: Web application for managing student results and complaint resolution workflows.

Hospital Record System: Full-stack system for digitizing and managing patient records.

Online Workers Connect / Hall Allocation System: Platforms connecting service workers with clients(More like E-Commerce Platform), and automating student hall/accommodation allocation.

EDUCATION

B.Sc. in Computer Science
Alex Ekwueme Federal University, Ndufu-Alike (AE-FUNAI), Nigeria
Second Class Honours, Upper Division .
